

LASCO SWEEP ELBOWS (1" - 4")

Average Head Loss Reduction:
LASCO Sweep vs Standard 90° Elbow

LASCO'S SWEEP ELBOWS HAVE BEEN ENGINEERED FOR OPTIMAL FLOW PERFORMANCE

FEATURES / BENEFITS:

- Sweep Elbows reduce pressure drop - a 1/3 to 2/3 reduction versus conventional 90° Elbows, depending on flow velocity and pipe diameter.
- All sizes are molded, not fabricated.
- Certified to ASTM D 2466
- Exceeds the performance requirements of the California Energy Code
- Engineered using Computational Fluid Dynamics (CFD) software to optimize fluid flow characteristics
- Certified to NSF/ANSI 61 and NSF/ANSI 372
- Burst Tested to Schedule 40 standards

APPLICATIONS:

Pool / Spa
Automatic Refill Systems
Irrigation
Water Features
AquaCulture (Fish Hatcheries, Shrimp Farming, Algae Cultivation, etc.)
Pond Systems

Slip x Slip
