

## HDPE TRANSITION UNIONS

- Designed for butt fusion, socket fusion or electrofusion onto 2" or 63mm HDPE lateral lines
- Made in USA
- Buna O-Ring

**LASCO Fittings Inc.** is pleased to announce our new HDPE Transition Unions. These unions are specially designed to connect HDPE lateral lines to various size gate valves and remote pressure regulating valves. These HDPE Transition Unions can be placed on both sides of the valve assembly for easy removal. Simply loosen the union nuts and disassemble.

- Union design for **Easy Removal** of the valve assembly.
- Compatible with 1" - 2" Valves

Part No	Size/Description	Ctn Qty	Working Pressure
P896-249	2" HDPE x 1" MIPT	10	200psi
P896-250	2" HDPE x 1¼" MIPT	10	200 psi
P896-251	2" HDPE x 1½" MIPT	10	200 psi
P896-020	2" HDPE x 2" MIPT	10	200 psi
P7896-J-249	63mm HDPE x 1" MIPT	10	200psi
P7896-J-250	63mm HDPE x 1¼" MIPT	10	200 psi
P7896-J-251	63mm HDPE x 1½" MIPT	10	200 psi
P7896-J-020	63mm HDPE x 2" MIPT	10	200 psi

### STANDARDS AND SPECIFICATIONS

- ASTM F-1970 – Standard Specification for Special Engineered Fittings, Appurtenances or Valves for use in Poly (Vinyl Chloride) (PVC) or Chlorinated Poly (Vinyl Chloride) (CPVC) Systems.
- ASTM F-1498 – Standard specification for taper pipe threads 60° thermoplastic pipe and fittings.
- MATERIAL – HDPE Nipple and Sch 80 Type 1 PVC
