

## Private Practice Residency in Vision Therapy & Neuro Optometric Rehabilitation

### We see children and adults with:

- Binocular Dysfunctions
- Learning Related Vision Problems
- Strabismus and Amblyopia
- Brain Injury: Traumatic, Acquired, Concussion
- Developmental visual skills issues (Autism, Down's Syndrome, Dyslexia, Special Needs)

Expand your ability to evaluate and treat, to help individuals develop or regain visual skills.

**Practice Management** to give you insights and experience in running a successful practice.

### Opportunity to:

- Treat alongside our experienced Vision Therapists
- Interact with other professionals: OT, PT, neuropsychologists, physiatrists, etc.
- Attend conferences, continuing education and committee meetings,
- Make presentations to colleagues and other professionals

### Maintain and develop skills in:

- **Primary Eye Care and Family Practice Optometry:** General examinations and traditional optometry for children and adults
- **Medical Optometry;** treat individuals with: glaucoma, conjunctivitis, diabetic eye disease, dry eye, punctal plugs, eye emergencies, etc.
- **Diagnostic Instruments:** OCT, Optomap, VEP, BIO, Visual Fields, Topographer, Pachymeter, etc.
- **Myopia Control** and orthokeratology for children
- **Orthokeratology** for adults; myopic, hyperopic, and multifocal ortho-k
- **Specialty Lenses** i.e. keratoconus, scleral lenses, post refractive surgery correction, etc.

**Program Length:** 54 weeks

### Clinical Teaching Opportunities:

Supervise optometry students

### Didactic Activities & Opportunities

- OEP Coursework
